We Care!

The health of your pet is of paramount importance to the staff at Sierra Veterinary Clinic. We pride ourselves in providing state-of-the-art diagnostics, treatment, and overall care for your cherished friend. Continuing education is mandatory for all staff members.

Individualized Health Plans

Along with a comprehensive physical examination, your veterinarian will evaluate your pet's age, breed and lifestyle to determine the risk of potential disease. After discussing your pet's needs, we will design a **preventive health care and vaccination plan** that is best for your pet.

Complete In-House Laboratory –

Our laboratory gives us rapid point of care abilities when we're treating sick or injured pets, and allows us to properly evaluate every surgical case prior to anesthesia.

Surgical Services – We provide all types of soft tissue and most orthopedic surgical services. If your pet requires surgery, our doctors will make sure that you understand all aspects of the surgery and all options available.

Pain Management is critical to your pet's recovery, so we take a proactive approach to ensure that your pet is as comfortable as possible using the most effective medications available.

Ultrasound – Allows high quality, non-invasive imaging of the abdomen and chest. Many diseases can be accurately diagnosed with ultrasound: heart disease, liver disease, and bladder stones to name a few.

Advanced Dentistry –

From routine ultrasonic scaling and thorough periodontal cleaning and dental surgery, our staff works as a team of three to provide dedicated monitoring, safe anesthesia, and charting of each tooth to identify problems in the early stages. Not sure if your pet needs dental care? We offer free dental evaluations. Ask us!

**State Of The Art
State Of The Heart**

Professional Grooming

Our professional groomers and gentle bathers are pleased to offer a variety of services. Routine and medicated shampoos are available to keep your pet's coat comfortable and cleansed.

AAHA Accreditation

Sierra Veterinary Clinic is a proud member of the American Animal Hospital Association (AAHA). Every 3 years we undergo inspections by AAHA to ensure compliance with their high quality standards of care in over 900 areas of patient care. We are among the elite 15% of hospitals that meet their stringent requirements.

Acupuncture & Alternative Therapies

We offer **acupuncture, homeopathy, and nutritional therapies.**

These modalities are termed complimentary therapy because they are an adjunct or additional treatment option when conventional medicines may not help completely. Acupuncture uses needles to stimulate nerves and move energy around the body. Among other things, the therapy can alleviate pain associated with arthritis and help the kidneys function better in cases of kidney failure.
