Why Your Pet Should Be Professionally Groomed

The fitness of your pet's skin is important in maintaining a happy, healthy pet. Skin disorders are some of the most common medical conditions seen by veterinarians.

What causes offensive pet odor?

Your pet spends most of its life at or near ground level, so whether playing in the yard or snoozing under the bed, your pet is in frequent contact with dirt and grime. Also, your pet's skin secretes a waxy oil that acts like a magnet for dirt, and the combination of dirt and oil encourages the growth of bacteria on the skin. **These factors frequently cause offensive pet odor.** In addition, the dirt, grime and oils on your pet's fur can rub off onto carpets and furniture, leaving an unpleasant odor. No one likes a smelly pet or a smelly house, so the condition of your pet's skin affects your environment, as well as your pet's health and happiness.

Our professional groomers are known for their loving care and many years of professional experience and take pride in the personal attention that they give your pet from start to finish. At Animal Medical Hospital, we can provide individualized grooming services to meet your pet's needs.

Why Professional Grooming at Animal Medical Hospital

We have a wide range of dog and cat grooming services available for young and senior pets alike. Introducing your pet to grooming at an early age, about eight weeks old, should pave the way for an enjoyable grooming experience as time goes on. For senior pets and pets with medical conditions, our groomers have experience in recognizing your pet's special needs, and they will provide the loving individualized care needed.

How We Groom and Bathe Your Pet

- ✓ Our full-service grooming process begins with a preliminary haircut to remove unwanted hair and mats.
- ✓ Your pet receives a luxurious Hydro-Surge® bath that therapeutically cleans the skin, removing any particles, dander or debris that may gather.
- ✓ Your pet will be thoroughly checked to determine any skin problems or conditions that may go undetected by the owner.
- ✓ Your pet will receive the professional haircut according to breed standard or owner's preferences.

Your Pet Will Love You and Receive Love While In Our Care!

- ✓ The nails will be clipped and the paws checked for any foreign matter, such as foxtails.
- ✓ Ears will be thoroughly cleaned with veterinary-approved cleaning solution and checked for infection or mites.
- ✓ We use only the highest quality shampoos and conditioners to achieve a fluffy, clean and healthy coat!
- ✓ We are able to check for fleas or ticks and can apply the appropriate treatments to help alleviate this pesky problem!
- ✓ After your pet is professionally dried, our groomers finish with the final trim and style. Bandanas, bows and colognes can be used as the finishing touch to your pet's professional grooming style.

Why the HydroSurge® Bathing System

Our HydroSurge® Massage Bathing System will deep clean the skin and coat better than hand washing. This technology is a forced water animal bathing system that drives the shampoo through heavy, thick coats and down to the skin. This is especially helpful for pets with dermatological conditions where a medicated shampoo is required. The HydroSurge® system is the perfect choice for pets with dry, flaking, itching and irritated skin. We have also found that pets love the massaging action and bathers love the stress-free bath.
